

Titrating an unknown monoprotic acid

Placeholder — replace me

This file is a stand-in for the full lab report.

Objective: Find the concentration and identity of an unknown monoprotic acid by titrating it with standardized 0.100 M NaOH.

To use your own report:

1. Export the write-up as a PDF and save it as `public/files/labs/acid-titration.pdf`.
2. Or change `files.report` for this lab in `src/content.js`.
3. Run `npm run check` to confirm the link resolves.
