

Stepan Varganov — Résumé

Placeholder — replace me

This file is a stand-in so every link on the portfolio works out of the box.

To use your own résumé:

1. Export your résumé as a PDF (one page is ideal).
2. Save it as `public/files/resume.pdf`, replacing this file.
3. Or save it under another name and update `person.resume.href` in `src/content.js`.
4. Run `npm run check` to confirm the link resolves.
